

AMERICAN CORRECTIONAL ASSOCIATION

Standard Approved August 5, 2005
Proposed by the National Gang Task Force

Written policy, procedure and practice provide for a system that identifies and monitors the movements and activities of inmates who pose a significant concern to the safety, security and orderly management of correctional institutions. This system should ensure that appropriate staff are made aware of these inmates and that procedures exist to ensure information is current and communicated in a timely fashion.

Comment:

Inmates include but are not limited to disruptive gang members, domestic and international terrorists and other inmates the facility determines are security threats.
